-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

By preliminary amendment filed concurrently with the application, claims 1-8 have been canceled. Claim 9 is the only remaining pending claim.

The disclosure is objected to because of the following informalities: On page 10, line 12, "146" should read -- 156 --.

Appropriate correction is required.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 9 is rejected under 35 U.S.C. §102 (b) as being anticipated by Linna.

The recitation "for use in a fluid mixing device" is a statement of intended use bearing no patentable weight.

The patent to Linna, in figure 1, discloses "a valve means... characterised by comprising: a body portion (2) having at least one fluid entrance aperture (14), for allowing fluid to flow into said body portion; a fluid exit aperture (at seat 48), for allowing fluid to flow from said body portion; entrance aperture sealing means (24) having biasing means (22) for biasing said entrance aperture sealing means (24) into a sealing position (at seat 16) in which said fluid entrance aperture is sealed; and exit aperture sealing means (41, 42) having biasing means (50) for biasing said exit aperture sealing means (41, 42) into a sealing position (at seat 48) in which said fluid exit aperture is sealed, said entrance and exit aperture sealing means being adapted to allow passage of fluid respectively into and out of said body portion, according to a specified pressure

differential between the pressure externally of said entrance aperture and the pressure externally of said exit aperture" as recited.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
